

**Kaduna State Basic Education
Baseline Mapping Report
2025**

1. INTRODUCTION

The Ministry of Education is supplemented by several parastatals that are responsible for a state-wide education, sub-sector, a sub-function, or for the management of an institution. These parastatals enjoy a certain level of autonomy in discharging their mission and the Commissioner may give directions of only a general character. There are eight parastatals charged with state-wide functions, namely: The SUBEB, the Kaduna State Schools Quality Assurance Authority (KADSSQAA), the Kaduna State Library Board (KSLB), The State Scholarship and Loans Board (KSSLB), Teachers Service Board (TSB), Kaduna State University (KASU), Nuhu Bamalli Polytechnic Zaria (NBPZ) and Kaduna State College of Education (KSCoE).

Education Policy Environment

National and international agreements, policies and targets inform the education policy in Kaduna State. Examples of these include the National Policy on Education (FRN 2013), the United Nations' Sustainable Development Goals (SDGs) and Education for All (EFA). Of importance is the Kaduna State Development Plan (2024 – 2027), which is a blueprint of strategies and actions that are to be taken to achieve the developmental aspirations of the state, chief among which is quality education for all. It contains the detailed policy thrust, strategies, expected outcomes and key performance indicators required to make Kaduna State a model for quality and Inclusive Education in Nigeria. **To improve education access and equity, Kaduna State, like other States in the Nigeria, has adopted all the existing policies in the Education Sector and, is steadily implementing them. These include the UBE Act, the Inclusive Education Policy and the National Policy on Education to mention a few.** In summary, the key policy thrust and strategies mapped-out for the Education sector are to:

- Improve and ensure adequate coverage and equitable access in the Education Sector – various strategies highlighted for achieving this policy include advocacy and sensitization, use of incentives, promotion of community participation, the establishment of more non-formal education centres and improved facilities;
- Improve teacher availability and quality at all levels – strategies highlighted include sustenance of school expansion policy, teacher capacity building and strengthening of the monitoring and evaluation system;
- Ensure continued maintenance of schools and facilities – strategies highlighted include periodic rehabilitation of schools' structures, provision of school furniture and expansion of existing facilities; and
- Considering that all of the school age population in Kaduna State is enrolled in public schools, and that this situation is expected to remain the same due to the state government's dedication to providing free and affordable quality education for all, priority has been given to public education in this sector strategic plan and little (beyond quality assurance and regulation) for private schools is planned for.

The scope for improving the quality of education in Kaduna State is enormous. Better school administration, good buildings and facilities, first-rate teaching standards, appropriate teacher training, fair salaries and clear career paths for education professionals will all contribute to ensuring better opportunities for children i.e. to ensure students become literate, numerate and equipped with the skills to fully participate in the Nigerian society and contribute to the economy. Attracting children to school should guarantee that they not only receive qualitative education but that they also receive relevant education that will be useful to them and can be applied in their own local and social settings.

The **Education Recruitment Plan** is designed to align with the **Kaduna State Basic Education Mandate**, which prioritizes **access, quality, and equity** in basic education. This plan ensures that the recruitment, training, and deployment of education personnel directly support the **State's Universal Basic Education (UBE) goals**, guaranteeing that every child receives free, compulsory, and quality basic education. It is also structured to fit within the **Education Sector Strategic and Implementation Plans** and the **Annual Operational Plan (AOP)** to optimize workforce planning and management.

Objectives

1. **Ensure Adequate Teacher Supply for Basic Education:** Recruit and deploy qualified teachers to meet the staffing needs of **public primary and junior secondary schools**, in line with Kaduna State's commitment to universal basic education.
2. **Enhance Teaching Quality and Learning Outcomes:** Prioritize the hiring of teachers with **relevant qualifications and subject expertise**, while providing **continuous professional development (CPD)** to improve classroom instruction and learner performance.
3. **Promote Equity in Teacher Distribution:** Ensure fair and **equitable deployment of teachers across urban and rural areas**, reducing disparities and improving access to quality education for all children.
4. **Support Inclusive and Special Needs Education:** Recruit specialized educators trained to teach children with **disabilities and learning difficulties**, ensuring compliance with Kaduna State's commitment to **inclusive education**.
5. **Improve Teacher Welfare and Retention:** Develop strategies to **motivate and retain** teachers through competitive remuneration, incentives for rural postings, and career advancement opportunities.

6. **Align Recruitment with Budgetary Provisions:** Implement a cost-effective recruitment strategy that fits within the **approved annual education budget and operational plan**, ensuring sustainability.
7. **Strengthen Monitoring and Accountability:** Establish clear **performance indicators** to track recruitment efficiency, teacher deployment, and overall impact on **learning outcomes**.

Goals

- **Achieve Full Implementation of the Kaduna State Basic Education Mandate:** Ensure that every school has a sufficient number of qualified teachers to support the goal of **universal access to quality education**.
- **Improve the Teacher-Pupil Ratio:** Align teacher recruitment with state and national **teacher-pupil ratio benchmarks**, reducing overcrowded classrooms and improving student engagement.
- **Address Rural Education Gaps:** Deploy teachers strategically to **hard-to-reach areas**, ensuring equitable education service delivery across the state.
- **Enhance Teacher Competency and Professionalism:** Provide **training programs** that align with Kaduna State's curriculum and teaching methodologies, improving the **quality of instruction**.
- **Support Special and Inclusive Education Policies:** Strengthen the recruitment of **special needs teachers and support staff**, promoting inclusive education for **children with disabilities**.
- **Build a Sustainable Education Workforce:** Develop **long-term teacher recruitment and retention strategies**, ensuring a stable and effective education system for future generations.

By aligning recruitment efforts with the **Kaduna State Basic Education Mandate**, this plan aims to establish a **well-trained, adequately distributed, and motivated workforce** that will drive

improvements in **learning outcomes, equitable access, and overall education service delivery** in the state

This report presents the findings of the baseline exercise conducted to map the number and duty stations of basic education teachers across Kaduna State. Additionally, it outlines a multi-year-old course teacher recruitment and deployment plan to address the identified staffing gaps.

OBJECTIVES OF THE EXERCISE

The objectives of this exercise include but not limited to:

1. Comprehensive Enumeration of Basic Education Teachers in Kaduna State:

- Carry out a thorough and accurate data collection exercise to establish a reliable database of all basic education teachers across public primary and junior secondary schools in Kaduna State.
- Capture relevant demographic and professional information, including qualifications, years of experience, subject specializations, and training history.

2. Identification of Disparities in Teacher Distribution Across Local Government Areas (LGAs):

- Analyze the geographical distribution of teachers to identify areas with shortages or surpluses.
- Assess how teacher placement aligns with student population density, school infrastructure, and educational needs in each LGA.
- Highlight regions requiring urgent intervention to ensure equitable access to quality education.

3. Assessment of Staffing Adequacy Based on Student Population and School Needs:

- Evaluate the current teacher-to-student ratios in comparison to national or state benchmarks.
- Identify gaps in subject-specific staffing, particularly in core subjects like Mathematics, Science, and English.
- Assess the capacity of schools to meet educational goals based on the availability of qualified teachers and other support staff.

4. Development of a Sustainable and Costed Plan for Teacher Recruitment and Deployment:

- Formulate a strategic, data-driven plan to address identified gaps in teacher availability and distribution.
- Provide recommendations for recruiting, training, and deploying teachers to underserved areas.
- Develop a financial plan to ensure cost-effective implementation, incorporating budget estimates and potential funding sources.
- Establish a monitoring and evaluation framework to track progress and ensure long-term sustainability.

This comprehensive approach will support evidence-based decision-making, strengthen the education sector in Kaduna State, and enhance equitable access to quality education for all learners.

3. Methodology

The baseline mapping exercise was designed to gather accurate and comprehensive data on the status of basic education teachers across Kaduna State. A mixed-method approach

was adopted, combining quantitative and qualitative data collection techniques to ensure a thorough understanding of teacher distribution, qualifications, and staffing adequacy.

The exercise involved collaboration with key stakeholders, including the Kaduna State Universal Basic Education Board (SUBEB), the Ministry of Education, and Local Government Education Authorities (LGEAs). These stakeholders provided critical insights and facilitated access to schools and administrative data. The methodology comprised the following components:

i. Physical Headcount and Validation of Teacher Records

- A comprehensive physical headcount was conducted across all public primary and junior secondary schools to verify the actual presence and status of teachers.
- Existing teacher records maintained by schools, LGEAs, and SUBEB were cross-checked for accuracy and completeness.
- Discrepancies in teacher data, including ghost workers, duplicated records, or inaccurate information, were identified and flagged for further investigation.
- Additional teacher details such as qualifications, subject specializations, and years of service were recorded to enhance the accuracy of the teacher database.

ii. Surveys Administered to School Heads and Education Officers

- Structured surveys were developed and administered to school heads, education officers, and relevant personnel to gather qualitative insights into staffing challenges and resource gaps.
- The surveys covered areas such as teacher workload, student-teacher ratios, subject-specific shortages, and recruitment practices.
- Respondents provided input on professional development needs, teacher retention challenges, and the impact of staffing levels on student learning outcomes.

iii. Geo-Mapping of Teacher Duty Stations

- A geo-mapping exercise was conducted to visually represent the distribution of teachers across schools in Kaduna State.
- Using Geographic Information System (GIS) tools, the physical locations of schools and teacher deployment patterns were plotted.
- This enabled the identification of underserved areas with low teacher density and the visualization of disparities in teacher allocation across LGAs.
- Geo-mapping also facilitated the identification of remote and hard-to-reach schools requiring targeted interventions.

iv. Analysis of Student-Teacher Ratios Across Schools

- Data on student enrollment and teacher numbers were collected to calculate student-teacher ratios at both the school and LGA levels.
- The ratios were benchmarked against national and state standards to determine areas where teacher shortages were most pronounced.
- Further analysis was conducted to assess subject-specific gaps, especially in core subjects like Mathematics, Science, and English.
- Trends and patterns in student-teacher ratios were documented to inform evidence-based decision-making for resource allocation and recruitment planning.

Quality Control and Data Validation

- To ensure data reliability, field supervisors were assigned to oversee the enumeration process and address challenges in real-time.
- Data verification protocols were implemented, including random cross-checks and validation visits to sampled schools.
- Stakeholder consultations were conducted periodically to validate findings and incorporate local insights.

This robust methodology provided a solid foundation for understanding the current status of teacher distribution and informed the development of actionable recommendations for improving equitable access to quality education across Kaduna State.

4. FINDINGS The findings of the baseline mapping exercise are summarized below:

- **Total Number of Basic Education Teachers:** Kaduna State has a total of **27,116** basic education teachers, with Male teachers constituting 45% and Female teachers 55%.
- **Teacher Distribution by LGA:** Disparities were observed in teacher distribution, with urban LGAs having excess teachers while rural LGAs face acute shortages, requiring more incentives for teachers deployed to hard-to-reach rural areas.
- **Student-Teacher Ratios:** The average student-teacher ratio across the state is **79:1**, exceeding the recommended **40:1** ratio in many areas. There is need to reduce this ratio to **60:1** through a targeted recruitment.
- **Qualification Levels:** **97%** of teachers meet the minimum qualification requirements, while 3% require additional training and certification.
- **Projected Teacher Deficit:** Based on learner's enrollment projections and the average number of teachers that exit the service due to retirement, the State requires an additional **9,227** teachers over the next **four (4) years** to meet optimal staffing levels.

5. RECOMMENDATIONS

- The state government should prioritize teacher recruitment in the annual budget.
- Rural posting incentives should be enhanced to encourage equitable distribution.
- Collaboration with development partners should be explored for funding support.
- Continuous monitoring and data updates should be institutionalized.

6. CONCLUSION

The findings from this baseline exercise underscore the critical need for a strategic and coordinated approach to teacher recruitment, deployment, and management in Kaduna State. The data reveals significant disparities in teacher distribution, with certain Local Government Areas (LGAs) experiencing acute shortages, while others may have a surplus of teachers. Additionally, subject-specific gaps, particularly in Mathematics, Science, and English, further exacerbate the challenges faced by schools in delivering quality education.

The analysis also highlights the impact of inadequate staffing on student learning outcomes, teacher workload, and overall school performance. Schools with unfavorable student-teacher ratios are unable to provide adequate attention to individual learners, leading to lower academic achievement and increased dropout rates. Addressing these disparities is essential to ensuring equitable access to quality education for all children in Kaduna State.

In response to these challenges, the proposed **multi-year teacher recruitment and deployment plan** offers a clear and actionable pathway to achieving sustainable improvements in the education sector. The plan is designed to:

- **Bridge Staffing Gaps:** By prioritizing the recruitment of qualified teachers in underserved areas, particularly in subjects with critical shortages.
- **Enhance Equitable Distribution:** Through data-driven deployment that ensures every school has an adequate number of teachers relative to its student population.
- **Support Continuous Professional Development:** By offering targeted training programs that enhance teachers' competencies and subject matter expertise.
- **Promote Teacher Retention:** By addressing factors contributing to teacher attrition, including poor working conditions and inadequate incentives.

- **Ensure Financial Sustainability:** By developing a costed implementation plan that leverages available resources from government budgets, donor agencies, and development partners.

Furthermore, the establishment of a robust monitoring and evaluation framework will ensure that progress is regularly assessed, challenges are promptly addressed, and necessary adjustments are made to keep the implementation on track.

By implementing the recommendations from this exercise, Kaduna State can build a resilient and well-equipped teaching workforce that meets the needs of its growing student population. This commitment to strengthening the basic education system will not only improve learning outcomes but also contribute to the broader goals of educational equity and human capital development in the state.
